

High Quality Chemically Produced Color Toners For Laser Printer & Photocopier

Polyton Color Imaging Inc. develops, formulates & exports OEM and compatible Black, Color and Eco-friendly Soy Based Toners for laser printers and photocopiers using world's latest toner producing technology called Chemically Produced Toner (CPT).

We understand the world wide demand of color toner which is increasing day and night. In order to serve a big demand from our customers spread worldwide. We have established state-of-the-art, well equipped high tech fully automatic computerized manufacturing plant.

Our well experienced research scientist are expert in technical & chemical processing know-how. The Research and Development center of Polyton Color Imaging Inc. located at Morbi (India).

Working in harmony with our customers, we produce optimum solutions for the non-impact printing industries. Our many customers includes significant and world's most famous brand name in Original Equipment Manufacturer (OEM) who trust us to develop and manufacture toners for their needs.

Besides, dry electrostatic toner products, our group companies are committed to supply Ceramic Tiles, Frits, Pigments, Printing Mediums(P.E.G.), Aluminium DCC/DPC/Enameled/Fibre Glass covered wires & bare conductor, welding machines etc.

Polyton Polymerized Toner

Chemical (or Polymerized) toners / Chemically Produced Toner (CPT) offer exciting possibilities to the laser printing and digital copying industry and are especially suited to new color applications.

Our range of Polyton polymerized toners are manufactured using a emulsifying polymerization process which produces round shape toner particles of a defined size avoiding the melt-extrusion, mechanical fine grinding and classification process involved in pulverized toner manufacturing.

Polyton toners offer a number of potential benefits for OEM's, cartridge re-manufacturers and end-users as a result of the properties that can be achieved by our flexible Chemically Produced Toner technology.

Polymerized Toner Manufacturing Process :

Process Equipment :

Vrieco Nauta®
Vacuum Dryer

Cyclomix
High Intensity Mixer

R & D (Particle Size Analyzer)
Pilot Plant

Properties and Technical Features:

- * control over mean particle size from 5 - >10 microns
- * narrow particle size distributions
- * control over particle shape (from irregular to spherical)
- * cyan, magenta, yellow and black toners available
- * Highest sharpness
- * melt rheology that can be targeted to customer requirements
- * excellent transparency for colour toners
- * ability to achieve oil-less fusion via wax inclusion
- * ability to vary gloss of images
- * excellent particle to particle homogeneity
- * Eco-friendly toner (No CO₂, SO₂, NO₂, CFC emission)

Particle Shape :

POLYTON TONER

PULVERIZED TONER

Analysis Data :

Xerox DocuColor 2045 Toner	Image Density	Usage Gram / Page
Cyan	2.46	0.065
Magenta	0.83	0.058
Yellow	0.77	0.059
Black	2.48	0.036

Reduced Printing Costs :

1. Maximum number of prints per kg of toner (i.e. minimum waste)
2. Simplicity of machine design (e.g. oil-less fusion, cleaner-less system)
3. Lower energy costs (e.g. low melting point)
4. Superior Free Flow, Superior Tribo Charge
5. Increase life of OPC/A-Si, Fuser roller, Blade

Improved Print Quality

1. High image resolution
2. High transparency
3. Uniform area coverage
4. Consistent and reproducible colour
5. Stability across a print run
6. Wide color gamut potential
7. Ability to print on different substrates

R & D Equipment :

Laser Particle Size Analyzer

Make	SYMPATEC, Germany
Model	Helos-BF

Liquid Nitrogen Plant

Make	STIRLING, Holland
Model	PLN 108S

Transmission Electron Microscope

Make	Philips, Holland
Model	Tecnai 20

Thermal Analysis System

Make	Perkin Elmer
Model	Pyris-1 DSC, Pyris-1 TGA, DTA-7

Supporting Instruments :

- * High Performance Thin Layer Chromatography(HPTLC)
- * Inductive Coupled Plasma Spectrometer
- * UV-VIS-NIR Spectrometer With Reflectance attachment
- * FTIR Spectrometer
- * Micro Hardness Tester
- * Gas Chromatography - Mass Spectrometry (GC - MS)
- * Gel Permeation Chromatography – GPC
- * 200 TTSP Classifying System (Hosokawa Micron)
- * Ion Chromatography
- * Q-Meter, M-Meter (EPPING GmbH-Germany)
